

# WATER pod PURIFICATION ON DEMAND

*“Making the Unthinkable Drinkable”*

## How it Works

The WaterPOD™ is a point of entry whole home system that purifies water on demand to every water outlet in your home.

*The World's Smallest and Smartest  
Water Purification System*

## The WaterPOD™ Process

- Multi-stage filtration customizable to individual needs
- Smart technology monitors system usage and alerts as needed
- Less than 1% water waste
- No chemicals used in purification
- Easy and inexpensive maintenance

## WaterPOD™ Functions

- Can produce 12,000 gallons of purified water each day.
- Minimal energy requirements – 120 volt
- Can be converted to solar
- Minimal environmental impact
- Small footprint - 28" x 31" x 18"

### Capable of Reducing Multiple Contaminants:

- Pharmaceuticals
- Volatile organic compounds
  - Methane
  - Hydrogen Sulfide
- Heavy metals
  - Lead
  - Arsenic
  - Chromium
  - Iron
- Non-Metals
  - Nitrates
  - Flouride
- Biologicals
  - Bacteria
  - Viruses

### Capable of Improving Water Esthetics Including:

- Odor causing compounds
  - Metallic taste
  - Discoloration

**“Making the Unthinkable Drinkable”**

## Why You Need a WaterPOD™

With an increasing concern about water quality between private well and municipal sources, a water purification system provides overall certainty about the water entering your home.

A WaterPOD™ is like having a mini water treatment plant within your home. Capable of improving odor, taste, and color while reducing bacteria, viruses, pharmaceuticals, volatile organic compounds, and heavy metals.

Stonehouse Water Technologies provides whole home water purification to consumers. Our mission is to deliver clean, safe drinking water to every water outlet in your home.

## *The World's Smallest and Smartest Water Purification System*

*“First testing that was done here, the water was not fit to consume. I was told by the head of the USDA lab, ‘When you shower, certainly keep your mouth and your eyes closed.’ Now I have, through Stonehouse, a POD in my basement. It’s life changing, it’s life saving.”*  
-Linda K.
